SKILLS

- UI/UX
- Product Design
- Data Visualisation & Storytelling
- Data-Driven Design
- Figma
- Software Engineering
- Information Design
- Game Development
- 3D Design (Unity 3D, Blender)
- Programming (C++, Java, C#, Python, HTML, CSS, React, Tailwind)
- Data Analysis
- HCI
- Motion Graphics & Animation
- Communication
- AI

PROFILE

Design Engineer with a BSc. (Hons.) in Computer Science & Design from FLAME University, operating at the intersection of data, design, and technology. I specialise in designing intuitive, user-centred interfaces, from discovery and wireframing through to high-fidelity Figma prototypes and engineer handoff. I bring both HCI rigour and full-stack engineering awareness to every project, making me an effective bridge between design and product teams.

WORK EXPERIENCE

IBO MAY 2025 - JULY 2025
UI/UX Intern

- Designed and built an MVP dashboard to simplify complex operational data for CXO-level stakeholders, creating executive-facing analytics products.
- Translated multi-source backend data into intuitive, decision-ready interfaces, applying UI/UX best practices to reduce cognitive load and accelerate insight consumption.
- Bridged technical engineering constraints with end-user needs via rapid prototyping in Figma, iterating across wireframes, data layouts, and interaction patterns.
- Applied data analysis to identify UX friction points, optimising navigation flows and search filters to improve overall usability.

Hippo Homes MAY 2024 - JULY 2024
Product Manager Intern

- Optimised search filters and end-to-end UX flows using data-driven analysis, measurably reducing user friction across the product.
- Built rapid prototypes in Figma that bridged backend capabilities with frontend user needs, enabling faster cross-functional alignment between engineering and design teams.
- Conducted usability reviews and iterated on interaction design to improve task completion rates.

The Watchers NFT Project AUGUST 2022 - DECEMBER 2022
Community Manager

- Led community strategy across platforms, driving organic growth through partnerships and engagement programmes, demonstrating communication and stakeholder management skills.
